

## What Is a web browser?

Web browser is a software application in which we visit websites or access information using internet. Eg. Google Chrome, Mozilla Firefox

## What Is a search engine?

Search engine is a website that provide links to other websites. Eg. Google, Yahoo!, Bing.

## What Is coding?

Coding is a list of step-by-step instructions that get computers to do what you want them to do. Coding makes it possible for us to create computer software, games, apps and websites.

Coding mei alag alag languages hote hai. Eg. HTML, PHP, JAVA, JAVASCRIPT, PYTHON.

Google jispe tum search karte ho woh bhi coding se banayaaa hai

With coding we can design the website/ application.

We can change the background colour.

We can add buttons

Koi bhi website ya application coding karke banaya jaata hai

There are two types of Websites

- 1) Coding websites
- 2) Drag and Drop Websites

Coding Websites are websites which is made by writing up the codes using different programming languages.

Drag and drop website builder is a tool that allows anyone to create a **website**. It doesn't require you to write code or learn a single command. You have to just select a basic layout (or theme), and **drag** pre-set elements to where you want them on each page.
